GLOBAL MARKET OVERVIEW

Global equity market indices broadly extended their gains for a third consecutive month, despite inflation fears in the U.S. and a new wave of COVID-19 infections dominating headlines across Europe. In the U.S., the S&P 500 Index returned +5.3% with data revealing that the unemployment rate was little changed at 6.1% in April, the IHS Markit Composite PMI increased to 63.5 in April, and the advanced GDP report indicated an annualised gain of 6.4%. In addition, the Federal Reserve left rates unchanged, acknowledging that the economy was improving whilst continuing to buy at least US\$120b of bonds each month. In Europe, the FTSE 100, Euro STOXX 50, and German DAX indices returned +4.1%, +1.9% and +0.8%, respectively. During the month, the IHS Markit Eurozone Composite PMI increased to 53.8 in April, with manufacturing continuing to perform strongly whilst services improved despite the negative impacts of ongoing lockdowns in the region. Furthermore, the European Central Bank held its refinancing operations, marginal lending facility and deposit facility rates at 0.00%, 0.25% and -0.50%, respectively, and will continue to conduct net asset purchases under the pandemic emergency purchase programme worth €1,850b until March 2022. In Australia, the S&P/ASX 300 Index returned +3.7%. Economic data revealed that the unemployment rate fell to 5.6% and dwelling prices increased 1.7% in April after a 2.6% increase during March, the strongest monthly increase since 1988. In addition, the Reserve Bank of Australia left its policy settings unchanged noting that the economic recovery was well under way and had been stronger than expected. Information Technology (+9.8%), Materials (+7.5%) and Industrials (+4.1%) were the best performing S&P/ASX 300 Index sectors. Energy (-4.7%), Communication Staples (-2.4%) and Utilities (-1.2%) were the worst performers. Bulk commodity prices were broadly up during the month, whilst the U.S. dollar weakened against all G10 currencies.

(Amazon) released a market update for the first quarter ended 31 March 2021, reporting net sales growth of 44% to \$108.5b, operating margin expansion of 288bps to 8.2% and diluted EPS growth of 126.7% to \$15.79 per share. Divisionally, North America achieved net sales growth of 40% to \$64.4b, International net sales were up 60% to \$30.6b and AWS net sales increased 32% to \$13.5b. At the product level, net sales across Online Stores increased 44% to \$52.9b, Third-party Seller Services +64% to \$23.7b, AWS +32% to \$13.5b, Subscription Services +36% to \$7.6b, Physical Stores -16% to \$3.9b, and Other, which primarily includes sales of advertising services, achieved net sales growth of 77% to \$6.9b. Highlights during the quarter included the disclosure that there are now over 200m Prime members globally, providing a recurring revenue stream as well as increased purchasing frequency and transaction size for Prime customers compared to non-Prime customers. Prime Video is now in its 10th year, with over 175m Prime members streaming content in the past year. Amazon continues to make progress toward powering all its businesses with 100% renewable energy by 2025, five years ahead of its original target of 2030, having announced 206 renewable energy projects globally. Management expects Q2FY21 net sales growth to range between 24% and 30%.

Microsoft Corporation (MSFT-US)

Primary Exchange	NASDAQ
GICS Sector	Information Technology
Market Cap (US\$m)	1,899,313

Microsoft Corporation (Microsoft) released its results for the third quarter ended 31 March 2021, reporting revenue growth of 19% to \$41.7b, operating margin expansion of 383bps to 40.9% and diluted EPS growth of 45% to \$2.03 per share. The company's Productivity and Business Processes segment revenue increased 15% to \$13.5b and its operating margin expanded 371bps to 44.5%, driven by continued growth across its Office, Dynamics and LinkedIn product and service offerings with its cloud products continuing to enjoy strong digital adoption curves. Microsoft's Intelligent Cloud segment revenue grew by 23% to \$15.1b and its operating margin expanded 537bps to 42.5%, primarily driven by revenue growth from Azure, the company's cloud computing business. The company's More Personal Computing (MPC) segment saw revenue growth of 19% to \$13.0b and its operating margin expanded 226bps to 35.2%, notably with gaming revenue increasing 50%. Management provided 4Q21 segment revenue guidance expecting Productivity and Business Processes revenue growth to range between 17% to 20%, Intelligent Cloud revenue growth to range between 21% to 23%, and More Personal Computing revenue growth to range between 5% to 8%.

Tesla Inc (TSLA-US)

Primary Exchange	NASDAQ
GICS Sector	Consumer Discretionary
Market Cap (US\$m)	683,425

Tesla Inc. (Tesla) reported its first quarter 2021 results in April, with total revenue and automotive revenues increasing by 74% and 75% respectively for the year-over-year period. Management noted the March 2021 quarter was the highest ever for vehicle production and deliveries. Combined Model 3 and Model Y deliveries increased by 140% to 182,847 for the year-over-year period, while total deliveries were slightly moderated, growing by 109% to 184,877. This was due in part to challenges from seasonality, supply chain instability and the transition to the new Model S and Model X. Publicly available OEM data revealed the Tesla Model 3 was the best-selling premium sedan in the world, surpassing the BMW 3 Series. Tesla remains confident in the uptake and customer acceptance of Electric Vehicles (EVs) revealing 98% of the cars traded into Tesla over the past two years (excluding Tesla vehicles) were Internal Combustion Engine (ICE) vehicles. Through the launch of new products and factories, as well as the reduced product mix of Model S and Model X vehicles, the average cost of production declined to below US\$38,000 per vehicle. The automotive gross margin increased by 95 basis points year-over-year to 26.5%, as the average cost of production of vehicles continues to decrease. Management expects to achieve 50% average annual growth in vehicle deliveries, with fluctuations depending on equipment capacity, operational efficiency, and capacity and stability of the supply chain.
